Hit Frequency: 10

Game description

"HOT BET FEATURE

When the HOT BET mode is activated, the player turns on an alternative set of reels, where the ability of complete fill of the reels with fruit becomes much higher. Those fruits that give X2 in the main game when fully filled will give x6. In this case, the player's bet becomes 2 times more with the same payments for winnings.

SUPER HOT BET FEATURE

When the SUPER HOT BET mode is activated, the player gets the HOT BET mode + the RUN ON REELS™ function (during the game, one or more reels may randomly start to respin to get additional winnings, when the RUN ON REELS™ function is started, the win is guaranteed). In this case, the player's bet becomes 3 times bigger with the same payments for winnings. Symbols in this mode are mainly stacked.

The symbols of fruits, chilly pepper and bells have a very classic and old fashioned design and when the winning comes the symbols activate and move with flames! The animation of the fire is something hot and makes the player feel the strong will to play and win more."
